

Retractable Hose

Perfect solution to
your hose problems
for your pneumatic
air tools

Hose is a non-marking PVC hose with heavy duty reinforcement with a max pressure of 300 PSI which makes it ideal for most projects

- Portable design lets you take and manage 50' of hose any where you need it
- Durable plastic case is crack resistant and designed for long life
- Hose retracts quickly, automatically and easily saving you time preventing you from manually winding the hose
- Keeps hose tangle free and keeps your work space organized
- Portable design is also able to be hung on a wall for use with large compressors
